DETAILED ACTION

Allowable Subject Matter

1. **Claims 1-23** are allowed.

The following is an examiner's statement of reasons for allowance:

With regard to claims 1, 22 and 23: These claims are allowable over the prior art of record because the latter, either alone or in combination, does not disclose nor render obvious an optical switch and process of switching comprising an organic film light control part wherein switching occurs by applying signal light and control light to the film with the wavelengths of the signal light and control light being set in a spectral region on the longer wavelength side in the absorption spectrum of the film where the absorbance is not more than 0.3 and by a real and/or imaginary parts of the refractive index of the light control part by the control light causing a phase difference in the signal light, in combination with the rest of the claimed limitations.

With regard to claims 2-21: These claims are allowable over the prior art of record because they depend from allowable claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

2. Applicant's arguments filed 25 May 2005, with respect to the rejections using the Tian reference have been fully considered and are persuasive. The reference and applicant's application have a common assignee and therefore does not constitute prior art according to 35 U.S.C. 103(c).
